

# INFIX COLORED GRANULES

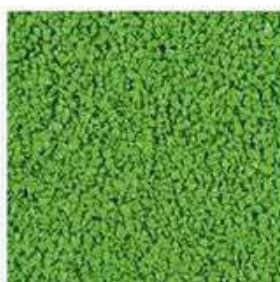

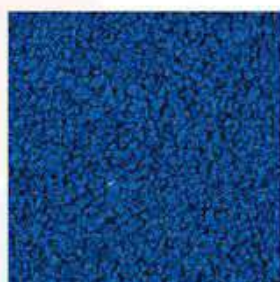

## DESCRIPTION

Our colored granules are designed and manufactured by our own Manufacturing processes and controlled by a team of qualified engineers to produce the best quality with minimum cost, we offer variety of colored granules and ensure the consistency of the color from bag to bag, our granules is not self ignited nor flammable, Also we ensure the high durable system and wear resistance which can be used in children's safety surfacing multigame areas (MUGA'S), general sports surfacing, swimming pool surrounds, running tracks and rubber tile production. It offers excellent compatibility with polyurethane binders and adhesives

Over 12 colors available    Colors currently available

All colors offer greater UV stability than current competitor materials

## TECHNICAL DATA

### INFORMATION ON THE PRODUCT BEFORE APPLICATION

Appearance	Angular granules
.S.G	kg/dm <sup>3</sup> 1.55
Tolerance	±0.05
BASE POLYMER CONTENT	20% <
BASE POLYMER	EPDM+SBR+RSS3
Hardness Shore A	55-65
Tensile strength	mpa 2.5 <
Elongation @ break	300% <
Particle size	1-3 , 0.5-1.5 and 4-8 depends on the system
